Council Policy Manual

Purpose of Policy

To set guidelines for implementing consistent asset management processes throughout Brewarrina Shire Council while delivering an Infrastructure Service that meets community expectations with respect to time, quality and value for money.

Policy Objective

To ensure adequate provision is made for the long-term replacement of major assets by:

- Ensuring that Council's services and infrastructure are provided in a sustainable manner, with the appropriate levels of service to residents, visitors and the environment.
- Safeguarding Council assets including physical assets and employees by implementing appropriate asset management strategies and appropriate financial resources for those assets.
- Creating an environment where all Council employees take an integral part in overall management of Council assets by creating and sustaining an asset management awareness throughout the organisation by training and development.
- Meeting legislative requirements for asset management.
- Ensuring resources and operational capabilities are identified and responsibility for asset management is allocated.
- Demonstrating transparent and responsible asset management processes that align with demonstrated best practice.

Policy Background

Council is committed to implementing a systematic asset management methodology in order to apply appropriate asset management best practices across all areas of the organisation. This includes ensuring that assets are planned, created, operated, maintained, renewed and disposed of in accordance with Council's priorities for service delivery.

Council owns and uses approximately \$174,073,000 of non-current assets to support its core business of delivery of service to the community.

Asset management practices impact directly on the core business of the organisation and appropriate asset management is required to achieve our strategic service delivery objectives

Adopting asset management principles will assist Council in achieving its Strategic Longer-Term Plan and Long Term Financial objectives.

Council Policy Manual

A strategic approach to asset management will ensure that the Council delivers the highest appropriate level of service through its assets. This will provide positive impact on;

- Members of the public and staff;
- Council's financial position;
- The ability of Council to deliver the expected level of service and infrastructure;
- The political environment in which Council operates; and
- The legal liabilities of Council

Policy Principles

A consistent Asset Management Strategy must exist for implementing systematic asset management and appropriate asset management best-practice throughout all Departments of Council.

- All relevant legislative requirements together with political, social and economic environments are to be taken into account in asset management.
- Asset management principles will be integrated within existing planning and operational processes.
- Asset Management Plans will be developed for major service/asset categories. The plans will be informed by community consultation and financial planning and reporting.
- An inspection regime will be used as part of asset management to ensure agreed service levels are maintained and to identify asset renewal priorities.
- Asset renewals required to meet agreed service levels and identified in adopted asset management plans and long term financial plans will be fully funded in the annual budget estimates.
- Service levels agreed through the budget process and defined in adopted Asset Management Plans will be fully funded in the annual budget estimates.
- Asset renewal plans will be prioritised and implemented progressively based on agreed service levels and the effectiveness of the current assets to provide that level of service.
- Systematic and cyclic reviews will be applied to all asset classes and are to ensure that the assets are managed, valued and depreciated in accordance with appropriate best practice and applicable Australian Standards.
- Future life cycle costs will be reported and considered in all decisions relating to new services and assets and upgrading of existing services and assets.
- Future service levels will be determined in consultation with the community.
- Training in asset and financial management will be provided for councillors and relevant staff.

Council Policy Manual

Application

Asset Management policy applies to all Infrastructure assets owned by Brewarrina Shire Council.

Responsibilities

Councillors are responsible for adopting the policy and ensuring that sufficient resources are applied to manage the assets.

The General Manager has overall responsibility for developing an asset management strategy, plans and procedures and reporting on the status and effectiveness of asset management within Council

.

Definitions

Infrastructure Assets

Include roads / bridges / pathways, sewerage / drainage, parks and nature reserves, water supply, buildings and plant, etc

Asset Register

A record of asset information with historical, financial, condition, construction and technical data.

Useful Life

The period over which a depreciable asset is expected to be used.

Asset Management Plan

A plan developed for the management of an infrastructure asset or asset category over the lifecycle of the asset. The Asset Management Plan establishes, for each Asset Category:

- Levels of priority with respect to usage and cost
- Operations and Maintenance
- Renewals and Replacements
- Financial Projections
- Continuous Monitoring and Improvement.
